Lucy Ray

Basic Infos

The character's name is Lucy Ray. She is a human teenage girl, 16 years old, who possesses special light powers. Lucy is the protagonist of an open world RPG.

Physical Description

Lucy Ray is a very pale girl with black hair, which has some glowing streaks. Through game progression, Lucy's light powers increase, which in turn increases the amount of glowing streaks in her hair. Her eyes glow as well. She wears black pants, a white Shirt and a yellow cloak.

Background

In Lucy's world, there is a constant cosmic battle between the forces of light and darkness. In her universe the light has won and people now live in harmony. However, her universe is not the only one out there. In a parallel universe, the darkness has taken control and driven all of the light out of the world. Her alternate version from the dark universe has wished for a long time to escape the forces of darkness and reached out to the light, which she has only heard stories of. The weak remaining light in her universe manages to create a portal that transports our protagonist Lucy from her light world into the world of darkness.

Lucy grew up in a small village as the youngest child. Her parents are simple people. Lucy has shown potential for light magic from a young age, which her family has always supported. She is training to be a mage, however, she is struggling to keep up with the other students, which makes her insecure about herself.

Now that Lucy has been transported to this different, dark universe, she realises that she is now the only source of light for the people there.

Personality / Goals

Lucy is a very kind, empathetic and helpful person. However, she is quite insecure, as her magical abilities seem to be inferior to those of her peers, at least in her mind. As she grew up in a universe of light, darkness was unknown to her before coming to the parallel universe. Thus, she is initially very terrified of the dark. Being now faced with this foreign world full of darkness, Lucy is determined to free the people from the darkness and bring back the light, in spite of her fear and insecurities.

Relationships

As Lucy enters a foreign universe at the start of the game, most of the people are new to her. The exception is her home village, where she will recognize the people but not truly know them, as they are now the parallel versions of themselves that have had a remarkably harder life. She will have an especially interesting relationship with her alternate version, who has summoned her there in the first place. Protagonist Lucy has great empathy for dark lucy and befriends her very quickly.

Special Skills / Superpowers / Special Equipment

Lucy is proficient in light magic. This manifests in the game as movement abilities, like double jumping or dashing, as well as spells that can be learned and upgraded by exploring the game world. Within the world, Lucy can find old relics of the warriors of light that used to fight the darkness. With them, she can expand her knowledge on light magic and grow stronger. Due to the immense darkness, Lucy will not be able to enter certain areas from the beginning. Only after her light becomes strong enough will she be able to explore these dark places and gradually light them up. The game world starts off consumed by darkness, but through the course of the game Lucy will illuminate more and more areas, until almost all of the map is bright and colourful again.
