SAML WebSSO – eduID.at

Welcome to the technical documentation site for eduID.at, the SAML2-based Identity Federation service within the [ACOnet Identity Federation](#).

- See [Policies](#) for formal documents governing this service, e.g. the [Technical Profile](#) or [Metadata Registration Practice Statement](#)
- See [Metadata](#) for sources of SAML metadata describing all eduID.at members
- eduID.at Metadata is secured by this [Metadata Signing Key](#), which needs to be configured to verify all eduID.at metadata instances.
- Deployers of [Service Providers](#) and [Identity Providers](#) will find installation and configuration documentation.
- ACOnet also offers a range of IDP [Discovery Services](#) to help subjects easily find their institution to log in with
- Please [contact us](#) with any questions you may have regarding this service.
